

We know customers have been waiting for a service like ours, but what are water retailers saying about us?

What do water retailers think of SwitchWaterSupplier.com?

We strongly believe in what we're doing to help the UK's open water market¹ mature, and also in providing non-household customers in England and Scotland with an easier way to manage their water and wastewater services and to switch water supplier, but what do the water retailers think?

As we continue to work closely with English and Scottish water retail companies² in an effort to meet the needs of the entire open water market, and not only those of non-household customer, we value their reaction and ongoing comment on the unique **SwitchWaterSupplier.com** platform³. Still at the very beginning of our journey, here are the things we're hearing from the community:

water2business have already seen great success from the SwitchWaterSupplier.com system and we are very excited to be welcoming new customers to our ever growing customer base. We are looking forward to continuing to work with Graham, Tim and the team to take part in more opportunities and promote engagement and water efficiency in the market. **Andy Coates, water2business⁴**

SwitchWaterSupplier.com is the first platform that enables multisite businesses to easily compare quotes and switch suppliers across the whole English and Scottish Market. As a retailer we find the site easy to use, but it also has the flexibility to allow retailers to add information on services like water efficiency and metering, which means bids are about best value rather than just lowest price. SwitchWaterSupplier.com is a major contribution to a good competitive water market.

Jacob Tompkins OBE, The Water Retail Company⁵

Switch Water Supplier is a fantastic concept, water2business are delighted to be working with the team and we have already had great success securing several new contracts. It is clear and simple to use and we are excited to continue to support Switch Water Supplier in developing the platform.

Daniel Schurrer, water2business⁴

Are you a water retailer or market stakeholder?

We'd love to hear your feedback on how we're doing. We're looking for feedback on the good and bad to help us develop our unique water tendering and switching platform.
